

CONNECT Beyond

A Regional Mobility Initiative

High Capacity Transit Corridors

Agenda

1. Welcome & Introductions
2. Project Overview
3. Total Mobility Network
4. High Capacity Transit Input
5. Candidate Corridors
6. Wrap Up & Next Steps

**CONNECT
Beyond**

Meeting Objectives

Update you on the status of
the CONNECT Beyond
Project

Present candidate high
capacity transit corridors
and answer your questions

Get your feedback/ local
area expertise to inform
our analysis

What we need from you

- Feedback on the candidate corridors
- Tell us what's missing
- Be our champions for future public involvement to further refine the corridors to be evaluated

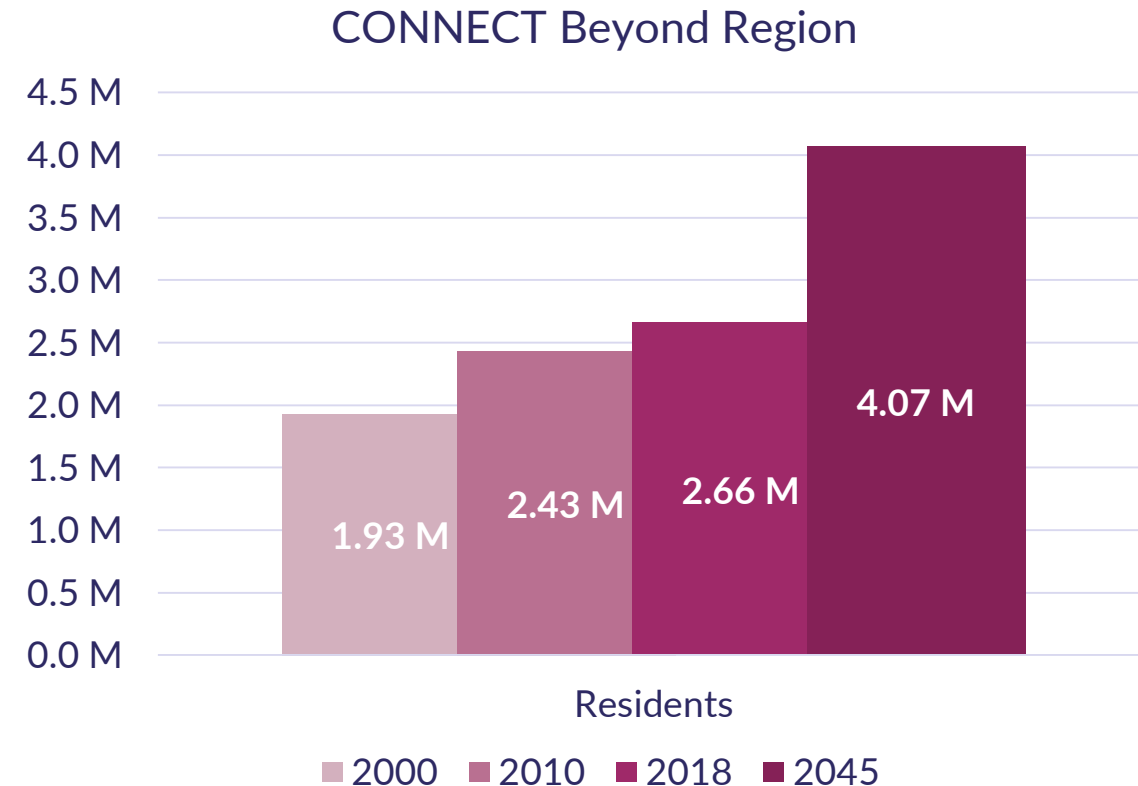

Project Overview

Jason Wager, CONNECT Beyond Project Manager,
Centralina Regional Council

Why Mobility Matters

As our region continues to grow, access to reliable, efficient, and well-connected transportation options is one of the **most important factors** to ensure everyone can benefit.

We need to find solutions to ensure that our neighbors and visitors can easily get where they want and need to go.

Source: NC Statewide Travel Model (NCSTM, Version 3.0)

CONNECT Beyond will...

- **Define** a transit vision
- **Identify** corridors and complement plans and infrastructure
- **Strategize** coordination opportunities
- **Develop** implementation tools

**CONNECT
Beyond**

Project Priorities

Increase Economic
Competitiveness

Improve
Transportation
Choices

Enhance Public
Transit

Promote Sustainable
Regional Growth

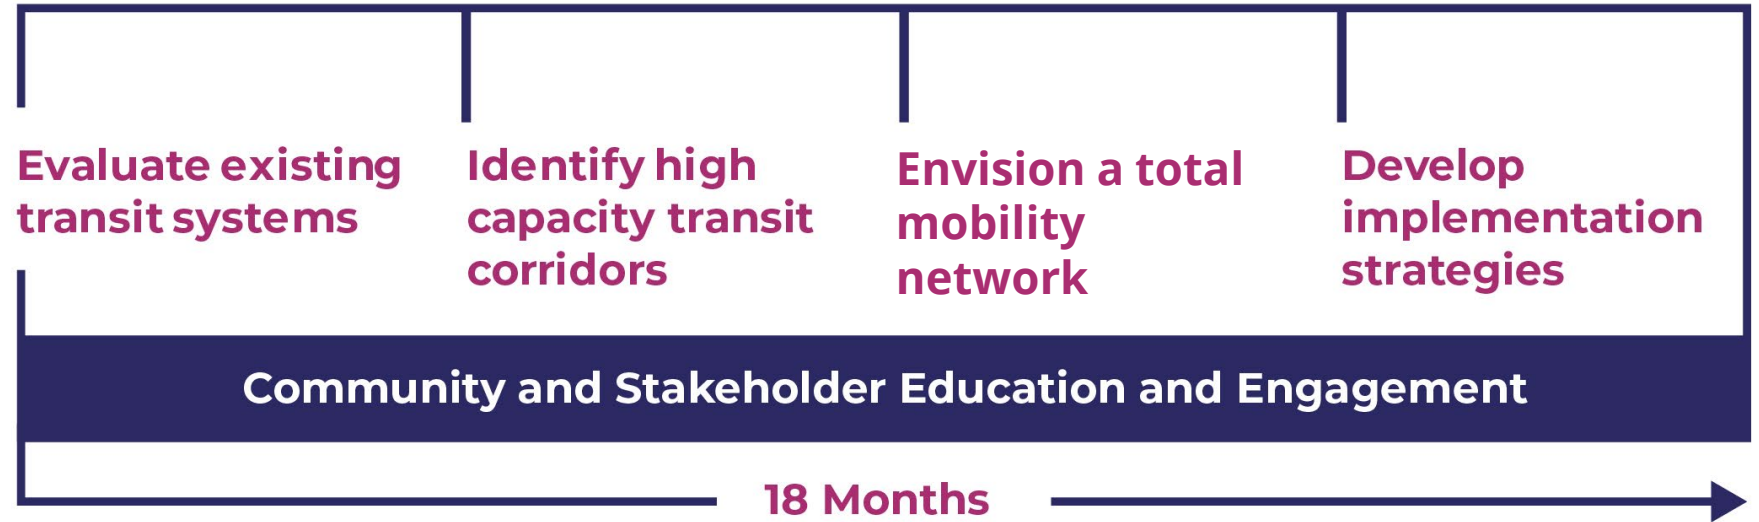

Advance Social
Equity

Encourage
Environmental
Stewardship

Project Timeline

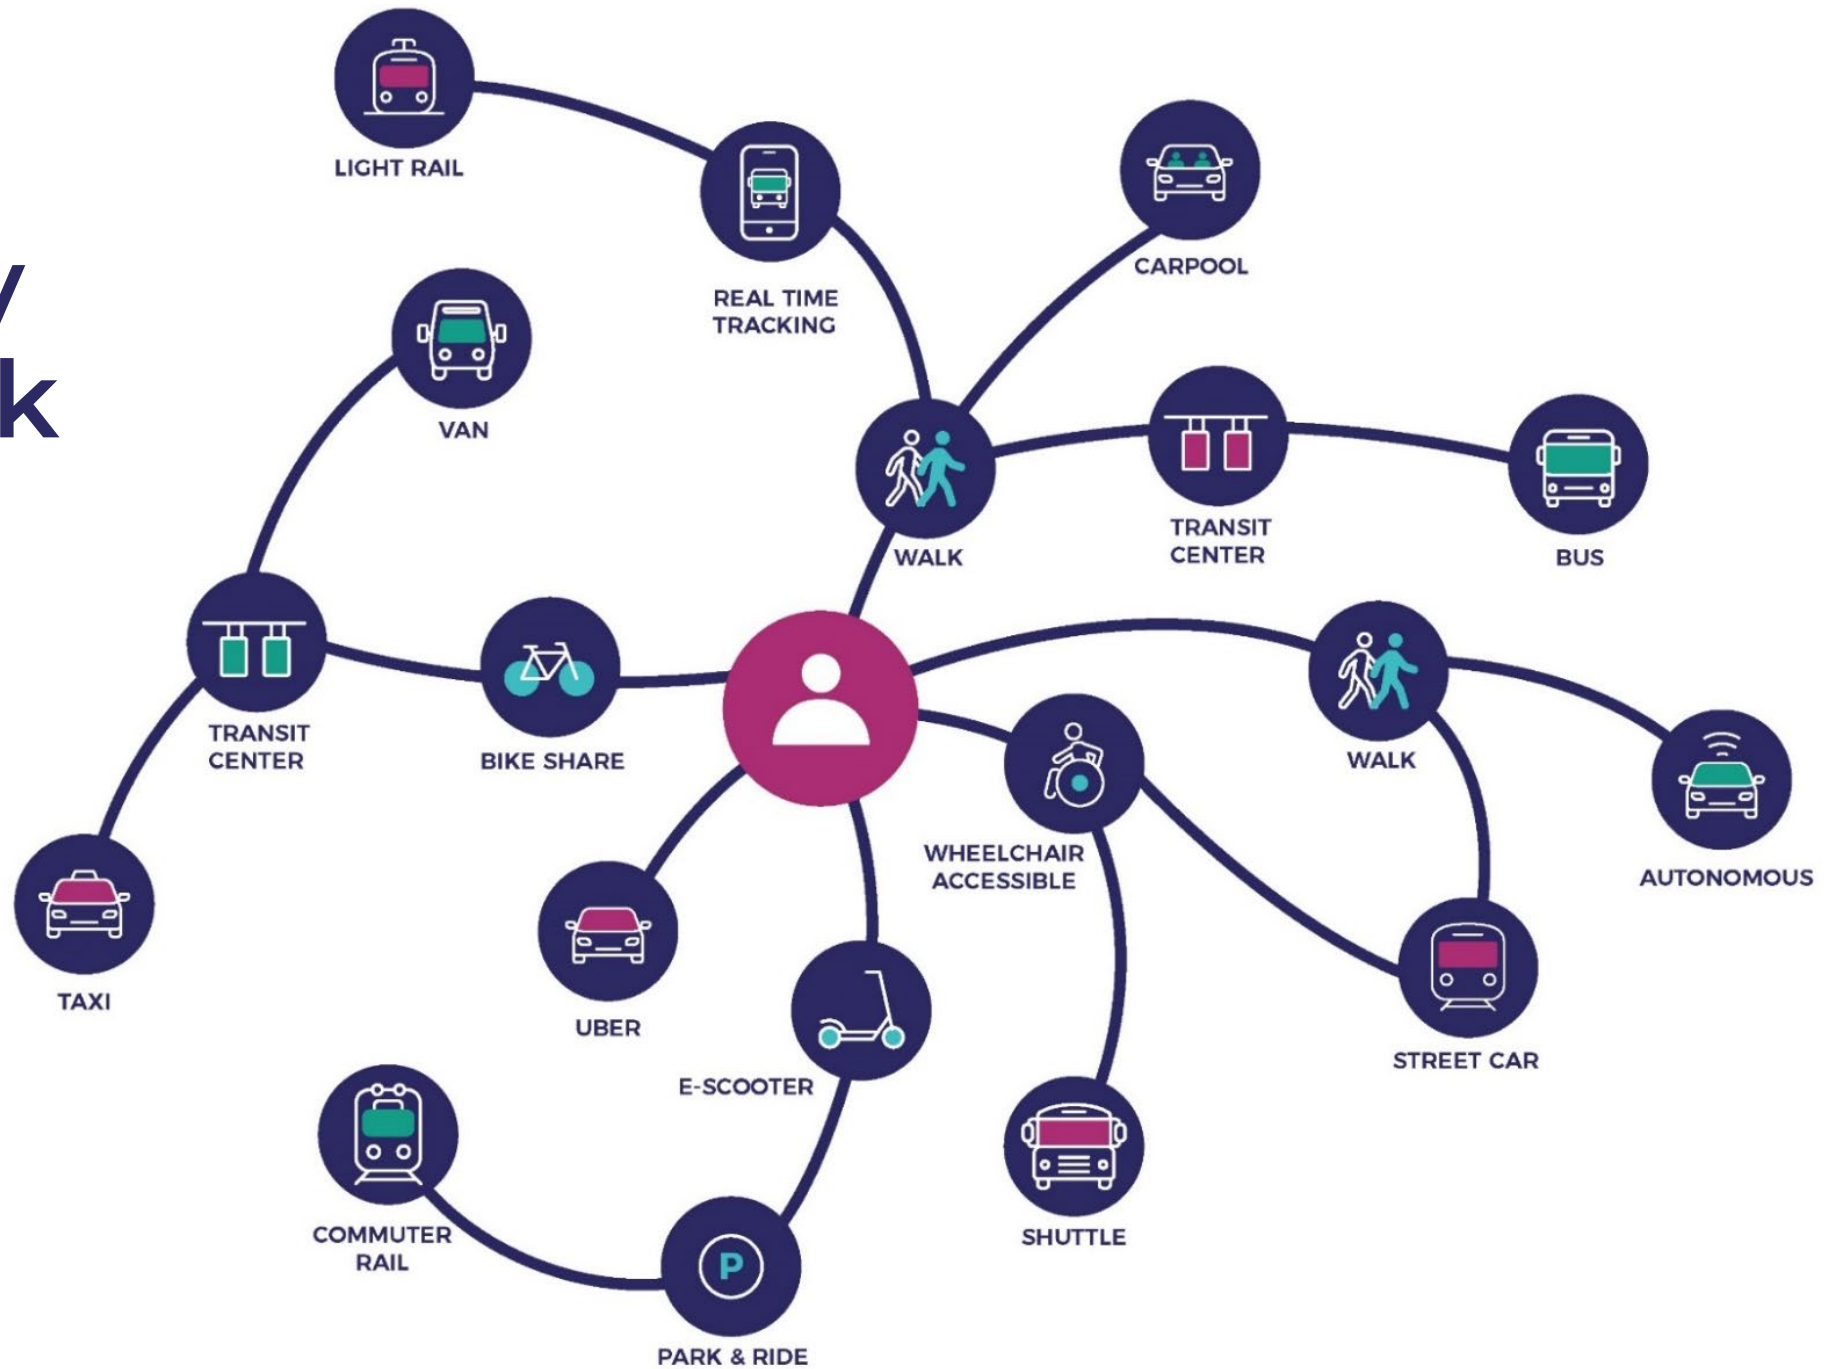

★ Your feedback today impacts step 2

Total Mobility Network

Jorge Luna, Project Manager, HDR

Total Mobility Network

Planning Process

1

Evaluate existing transit systems

- › What are we doing well?
- › Where are the gaps and barriers to mobility?

2

Identify high capacity transit corridors

- › Which corridors would be good candidates for regional transit connections to best connect people to jobs, housing, medical services, education and other key destinations?

3

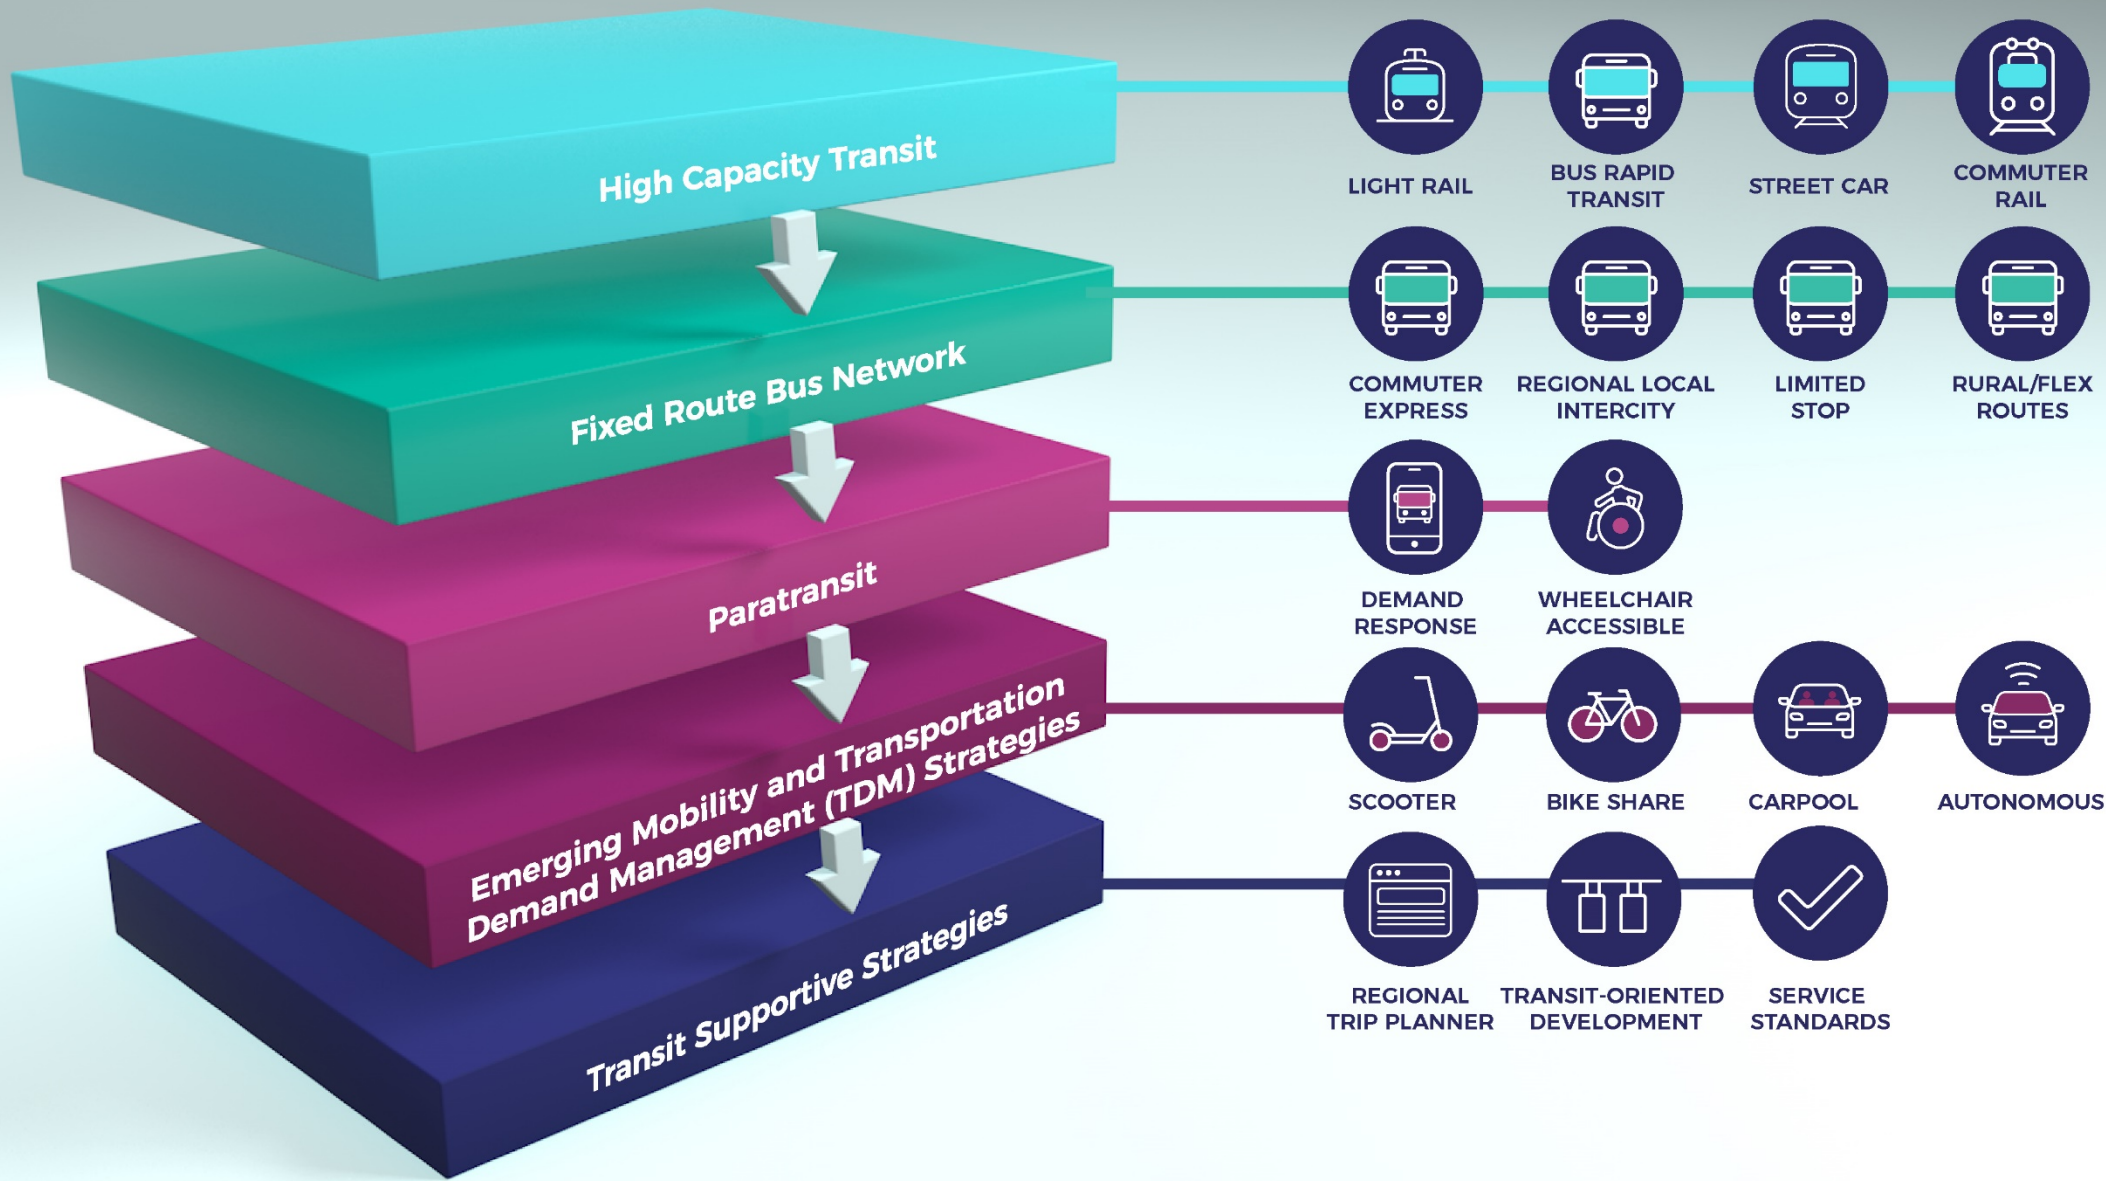

Envision a total mobility network

- › How can we best expand local services to increase transportation options and increase access to high capacity transit corridors?

4

Develop implementation strategies

- › How can local transit providers and planning agencies use the results of the initiative?

High Capacity Transit

Fixed Route Bus Network

Paratransit

Emerging Mobility and Transportation Demand Management (TDM) Strategies

Transit Supportive Strategies

LIGHT RAIL BUS RAPID TRANSIT STREET CAR COMMUTER RAIL

COMMUTER EXPRESS REGIONAL LOCAL INTERCITY LIMITED STOP RURAL/FLEX ROUTES

DEMAND RESPONSE WHEELCHAIR ACCESSIBLE

REGIONAL TRIP PLANNER TRANSIT-ORIENTED DEVELOPMENT SERVICE STANDARDS

The background is a solid teal color. On the left side, there are several overlapping, semi-transparent geometric shapes in various shades of teal. These shapes include a large circle, a smaller circle, and several irregular polygons, creating a layered, abstract design.

High Capacity Transit Input

What is High Capacity Transit?

High capacity transit refers to transit modes that have more capacity than traditional bus, such as light rail, bus rapid transit, express bus, and commuter rail.

What is Commuter Rail?

Urban passenger train service consisting of local travel between a central city and outlying areas operating on a regular basis and is generally characterized by specific station-to-station fares, relatively long distance between stops, and only 1-2 stations in the central business district.

REGIONAL DATA

Additional Stakeholder Input
Project Goals & Vision
Regional Transit Engagement Series
Travel Patterns/Behaviors
CONNECT Our Future
Land Use Growth/Changes
Population & Employment Growth
Local & Regional Transportation Plans
Transit Plans

We are here

Development of Candidate High Capacity Transit Corridors
The data informs what corridors could be candidates

Committee & Public Input
Review high capacity transit corridors and obtain agreement

Refine
Identify missing corridors, refine, confirm, conduct readiness screening

Refined Candidate Corridors
Refined per input and analysis

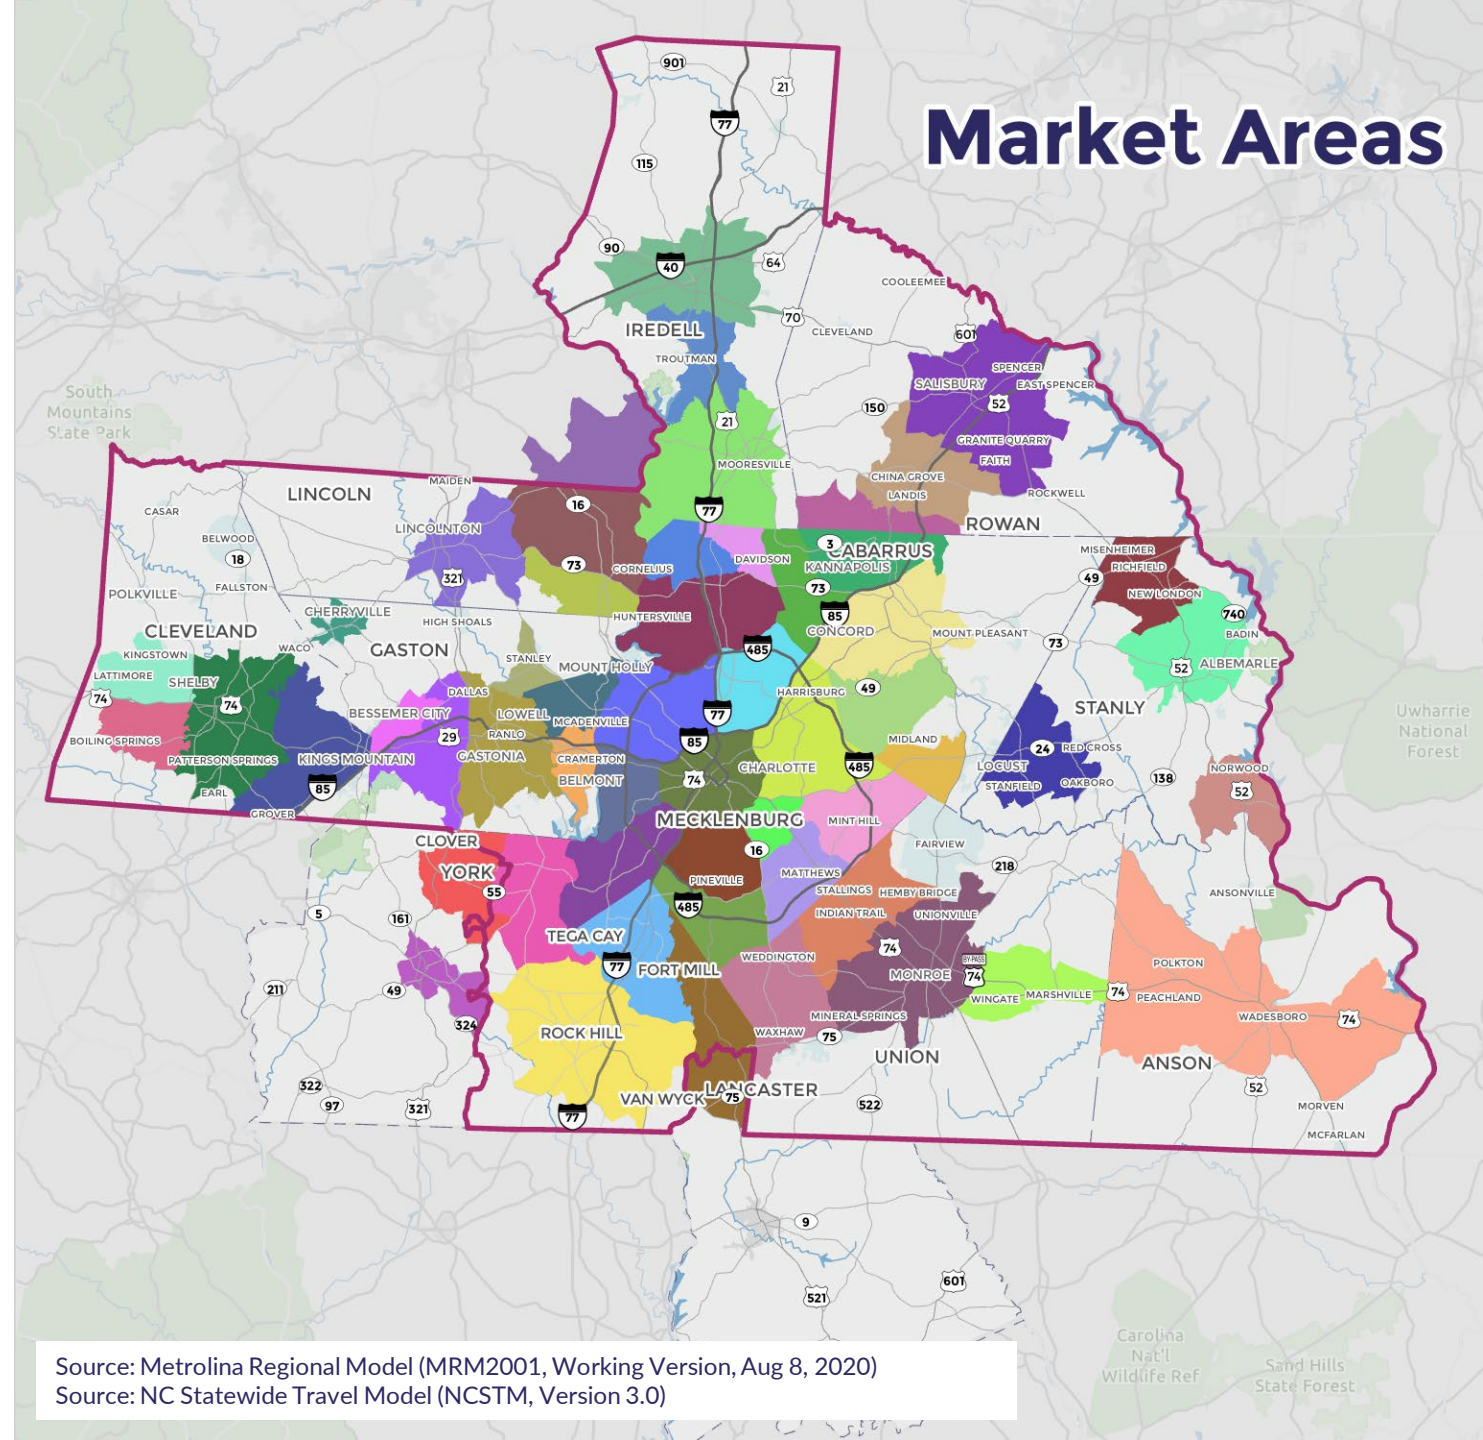

TAC & PAC Input
Review high capacity transit corridors and obtain agreement

Preferred High Capacity Transit Corridors
CONNECT Beyond high capacity transit preferred corridors

Next Steps
Incorporate preferred corridors into additional tasks

Transit Market Areas

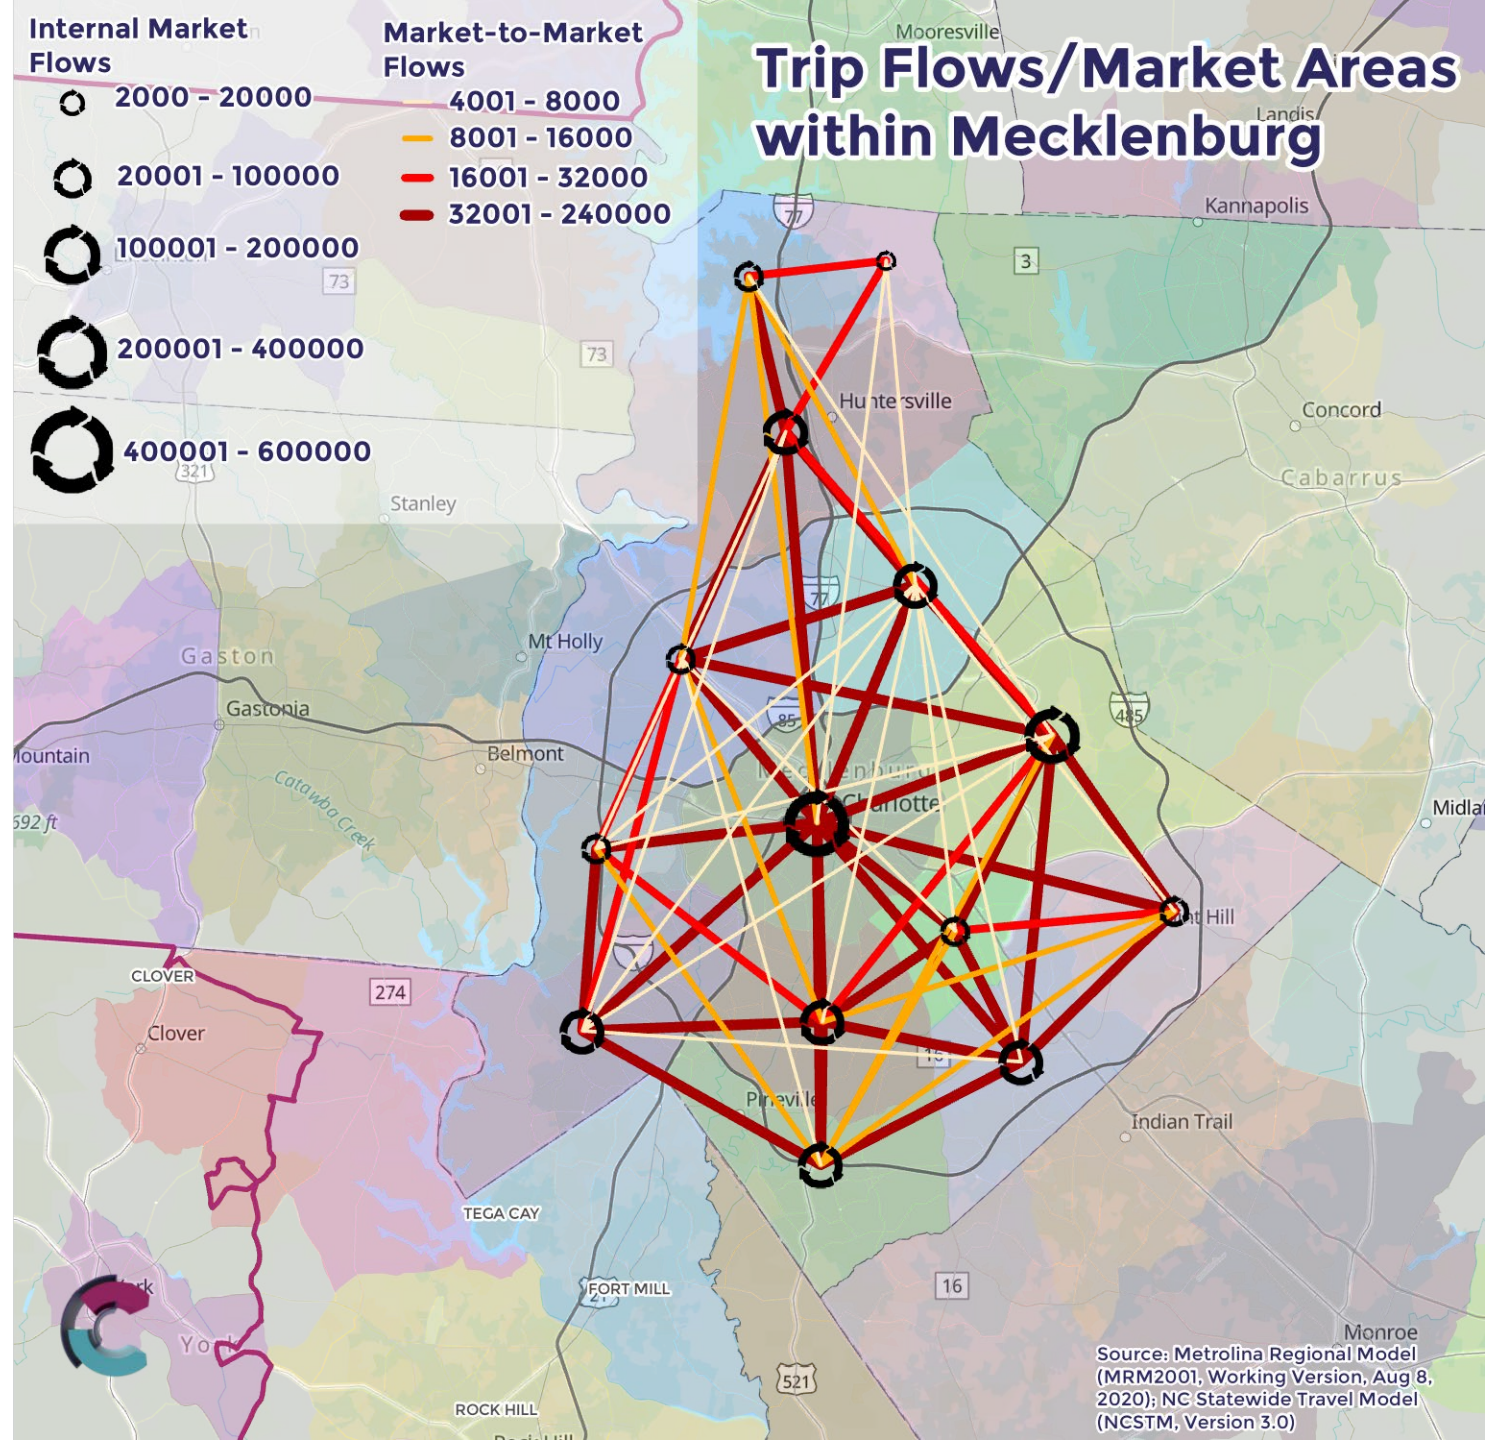

- 3,400+ TAZs Metrolina Travel Demand Model and the Statewide Model
- Condensed them down to 55 Transit Market Areas
- Each of the Transit Market Areas has unique transit service needs and different levels of potential transit demand
- Data shows travel within and between market areas

Source: Metrolina Regional Model (MRM2001, Working Version, Aug 8, 2020)
Source: NC Statewide Travel Model (NCSTM, Version 3.0)

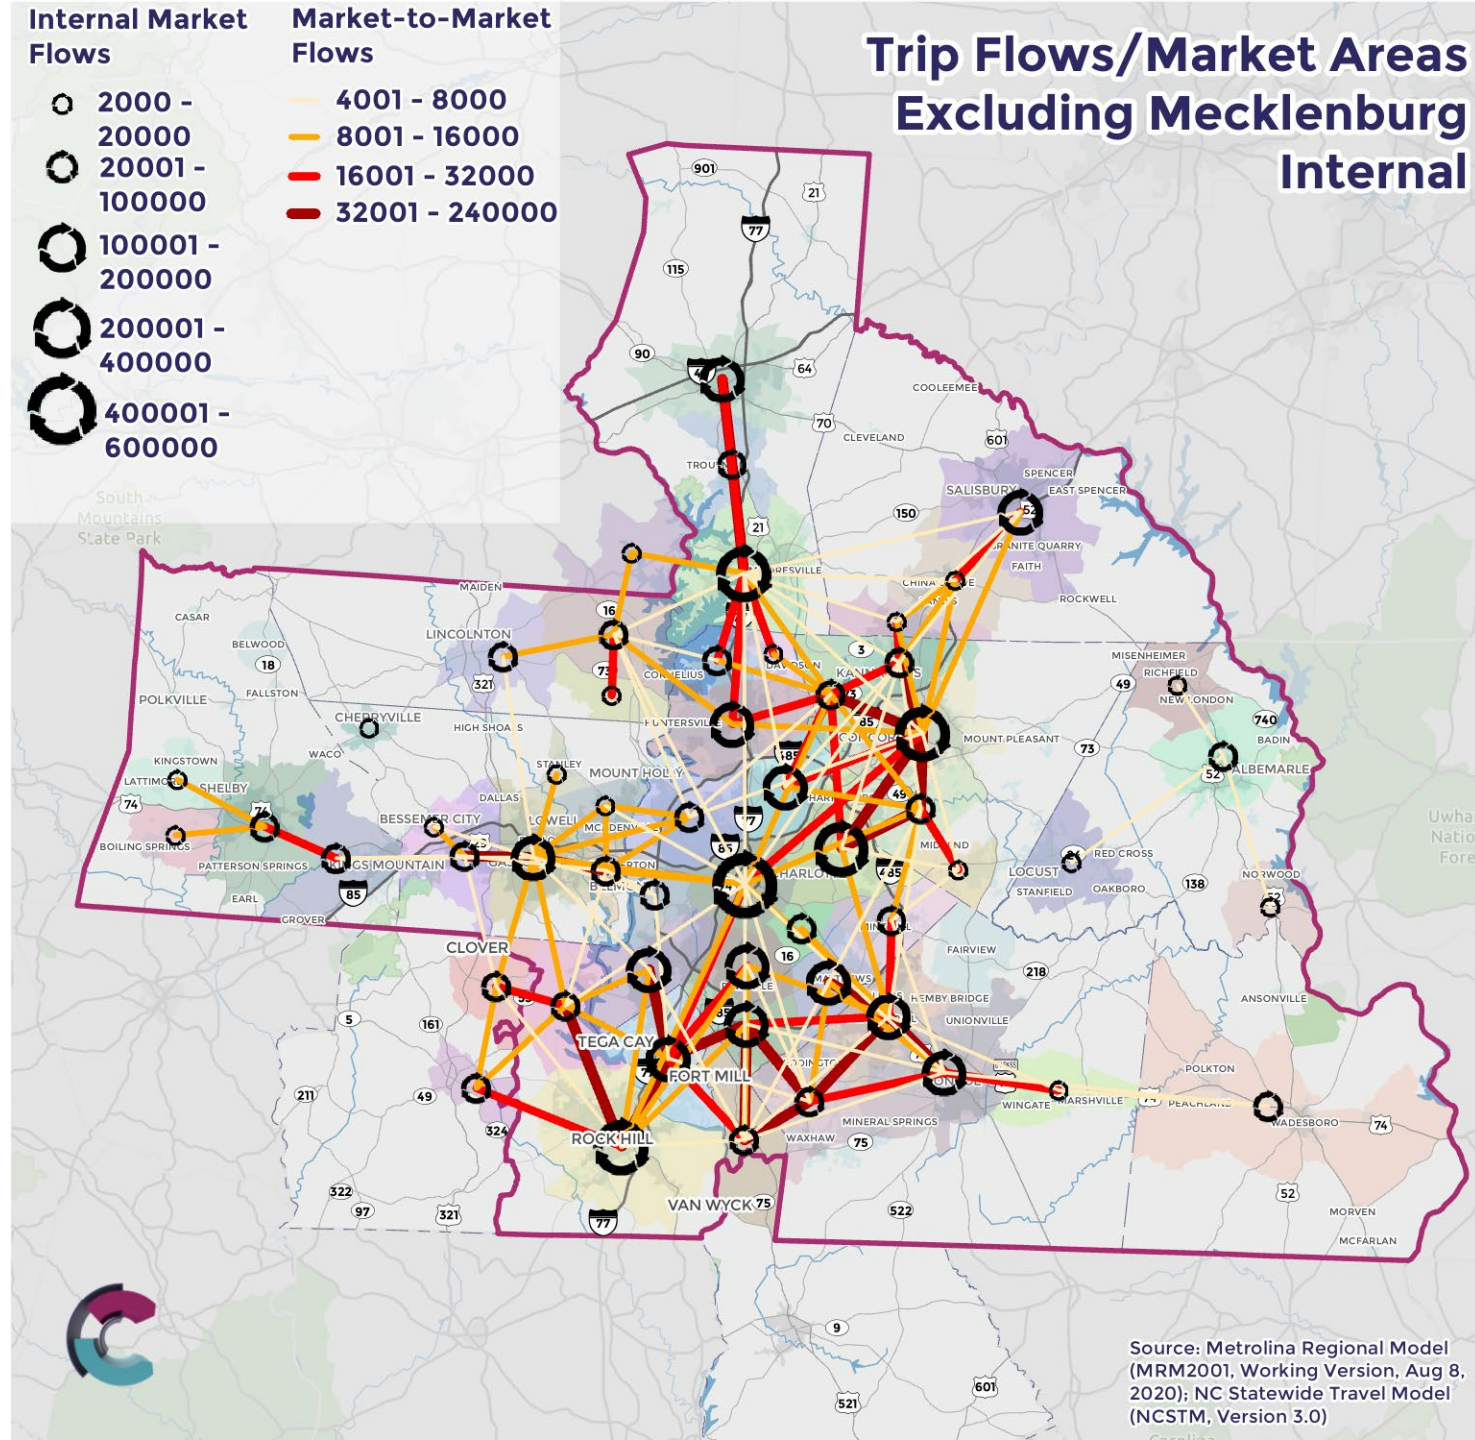

Mecklenburg Internal Market Areas

- Many trips stay internal to market areas , they start and end in Uptown
- Strong attraction from outer market areas to Uptown from the north
- Strong radial travel patterns surrounding Uptown
- Airport attractor

Market Areas Excluding Internal Mecklenburg

- Many trips stay internal to market areas: Uptown, Gaston, Salisbury, Monroe, Rock Hill
- East-west travel on NC73
- Ballantyne area drawing trips from southern study area
- Concord / Kannapolis attracting neighboring travel markets

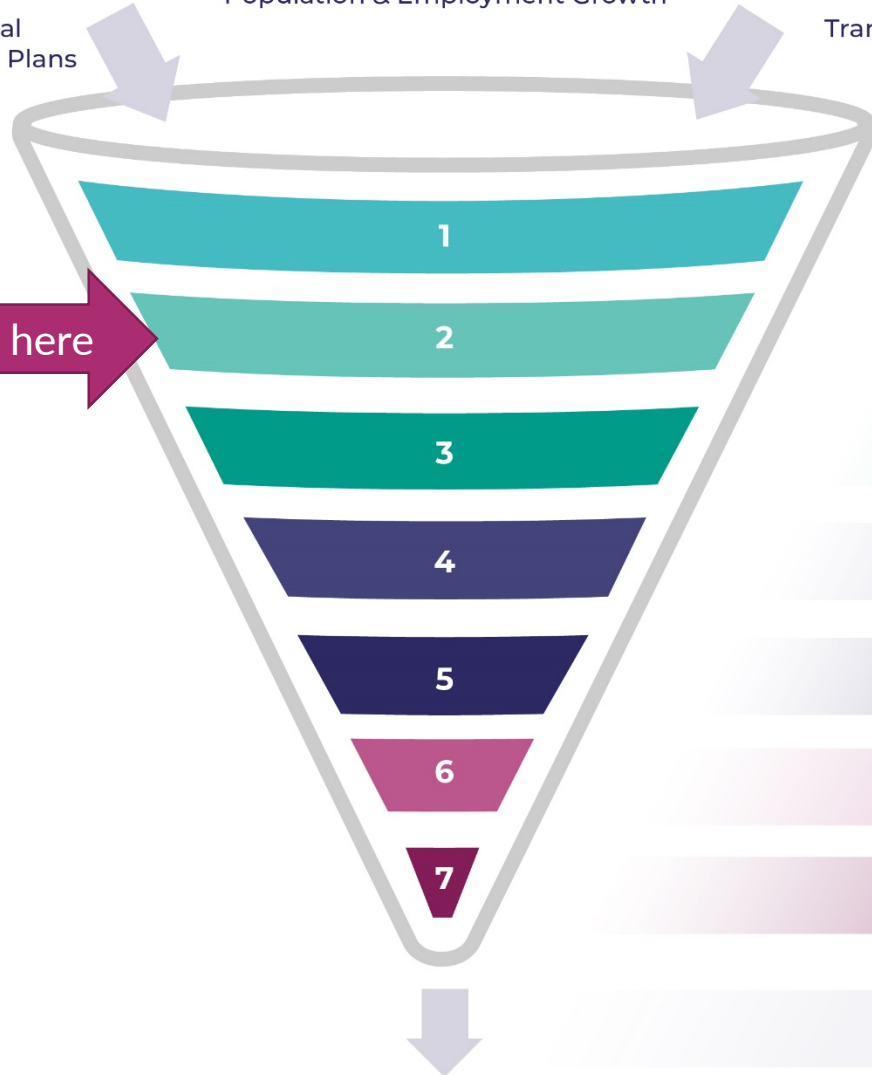

Candidate Corridors

Preferred High Capacity Transit Corridors
CONNECT Beyond high capacity transit preferred corridors

Next Steps
Incorporate preferred corridors into additional tasks

What we need to know

1. Do the preliminary corridors make sense?
2. Are there additional corridors that need to be considered and are we reaching the right key destinations?
3. Are there key areas or emerging areas of your community that may warrant HCT in the future?
4. Are there areas of regional significance that we need to know about because either the area should be considered for a corridor connection or because the area should be avoided due to cultural, environmental, or other reasons?

How to provide feedback

Chat box

Raise hand to speak

Leave comments
directly on the map

Next Steps

What's Next?

Project Management Team

- Present candidate corridors to all MPO/RPOs, Policy Advisory Committee and Community Advisory Committee
- Launch Community Survey

Committee

- Provide feedback on candidate corridors through the StoryMap if they have more to share
- Be our champions for future public involvement to further refine the corridors to be evaluated

2020

2021

Mar. Apr. May June July Aug. Sept. Oct. Nov. Dec. Jan. Feb. Mar. Apr. May June July Aug.

Public Engagement

Community Survey #1

Tell us where you want to go and how you want to get there.

Listening Sessions

We'll take a deeper dive to understand the needs the community

Community Survey #2

Review our recommendations and share feedback.

Advisory Committees

Evaluating existing transit systems

Make recommendations for potential high capacity corridors

Identify opportunities for commuter rail

Strategize ways to better coordinate regional bus services

Develop a transportation demand management plan

Document transit-oriented development strategies

Consider improving connections between urban & rural transit services

Develop final recommendations & implementation strategies

Upcoming Milestones

Fall 2020

- Present Refined Candidate Corridors
- Form ad hoc committee to begin regional bus coordination and TDM strategies

Winter 2020/2021

- Field observations and ride-arounds
- Evaluate local TDM needs – local interviews
- Targeted meetings to evaluate urban to rural connections

Spring 2021

- Scenario workshops for integrated bus service strategies

Summer 2021

- Review preliminary and consolidated final results
- Present draft and final plan

Thank You
